

NOAP Research Committee Meeting Minutes

August 10, 2022

Occurs 2nd Wednesday of the month

Meeting to begin at 2pm EST

Agenda

1. Roll call
 - John Furman - Present
 - Maureen Farrell - Present
 - Abby Migliore - Present
 - Mike Harkreader - Absent
 - Sheron Russell - Present
2. July meeting minutes accepted a written
3. August Research Paper of the Month

AANA (2021). Addressing Substance Use Disorder in Anesthesia Professionals: Position Statement.

4. Continued discussion regarding standard performance measures project

Action:

- John to collate measures collected during Phase I and to send to the committee for review by August 25

5. Developing a consensus standard drug test panel: Collecting initial recommendations from the project panel

Action:

- Based on the input collected so far John will develop a high-level outline for panel review and continued work

6. Old Business:

- FSPHP MAT position statement endorsed by the Board and posted on the NOAP website
- Committee member recruitment: Recruitment notice sent. No interest received at this point.

7. New Business:

Are you interested in participating in clinical research related to your recovery?

The National Institute on Drug Abuse (NIDA) is conducting a research study looking at brain imaging changes at the start of sobriety in physicians and other health professionals participating in a Physicians Health Program (PHP) or equivalent.

- The study includes an ONLINE-only component, with total participation about 4-7 hours.
- Eligible participants may also be invited to complete the main study, which includes 1-3 in-person visits to NIDA at the Johns Hopkins Bayview Campus in Baltimore.
- In-person visits comprise a full day of procedures, including two brain imaging (MRI) sessions at each visit, and an overnight stay in an on-campus clinical research unit the evening prior to the study visit.
- Compensation is about \$100 for the online only study, and \$335 to \$905 for completing the in-person imaging visits. NIDA will cover transportation expenses.
- If you participate in the imaging sessions, you will also receive a picture of your brain on a T-shirt.

National Institute on Drug Abuse

* Participation in this study is completely voluntary, not part of PHP participation, or part of any treatment and does not provide any direct benefit. Whether or not a person participates will not have any impact on their status at a PHP or future treatment.

NIDA/NIH-FSPHP Research Study Opportunity!

The National Institute on Drug Abuse (NIDA)/National Institutes of Health (NIH), in collaboration with the Federation of State Physician Health Programs (FSPHP), is conducting a research study to understand how neural circuitry and human physiology is changed by addiction and repaired by recovery. Our PHP follows your recovery status closely – we understand your journey in recovery better than any other set of people in the world. This cohort—YOU—are essential to the goal of this research study – to identify brain biomarkers of addiction and thus, optimize the efficacy of currently available therapeutics. **Please contact Betty Jo Salmeron, M.D. at (443) 740-2651 or BSalmeron@nih.gov to learn more.**

Meeting adjourned at 2:45 pm

Respectfully submitted by: John Furman PhD, MSN
